ABOUT ME

I am a dedicated Full Stack Developer with expertise in building responsive and user-friendly web applications using modern technologies across the entire development stack. Proficient in frontend technologies like HTML5, CSS3, JavaScript, React, and Next.js, as well as backend development with Laravel, Flask, and API integration using Postman. I have experience leading development teams, integrating complex systems such as SIAKAD, and teaching programming concepts to university students. Passionate about creating seamless user experiences and robust backend systems, I thrive in dynamic environments and continuously strive to enhance my skills and deliver innovative solutions.

EXPERIENCE

Laboratory Assistant – Web Programming – Hasanuddin University Sep 2025 – Present

- Teach advanced web development concepts including modern frontend and backend frameworks
- Guide students in full stack development using Laravel, Flask, React, and Next.js
- Develop comprehensive course materials and practical projects for hands-on learning
- Collaborate with lecturers to deliver effective and up-to-date programming instruction

Laboratory Assistant – Object-Oriented Programming – Hasanuddin University Mar 2025 – May 2025

- Assisted professors in teaching Object-Oriented Programming concepts using Java
- Developed practical exercises and code examples to reinforce theoretical concepts
- Graded student assignments and provided constructive feedback for improvement
- Collaborated with other lab assistants to create comprehensive learning materials

DBS Foundation Coding Camp 2025 – Front-End Web Development – Bank DBS Indonesia x Dicoding Indonesia Feb 2025 – Jul 2025

- Completed intensive online coding bootcamp scholarship program focused on Front-End Web Development
- Mastered modern web development technologies and industry-standard best practices
- Progressed through structured learning path from basic to advanced levels
- Developed hands-on projects using HTML, CSS, JavaScript, and modern frameworks
- Earned certifications in front-end development from Dicoding Academy

Laboratory Assistant – Web Programming – Hasanuddin University Sep 2024 – Nov 2024

- Taught web development fundamentals including HTML, CSS, and Bootstrap
- Guided students in backend development using PHP and Laravel framework
- Collaborated with lecturers to prepare and deliver course materials effectively

EDUCATION

Hasanuddin University 2022 - Present

Bachelor's Degree in Information Systems

GPA: 3.72

SKILLS

HTML5, CSS3, JavaScript, React, Next.js, Svelte, TailwindCSS, Bootstrap, Laravel, Flask, PHP, Postman, RESTful APIs, Figma, Git, GitHub, Responsive Design, Cross-Browser Compatibility, Full Stack Architecture

Frontend Development: HTML5, CSS3, JavaScript, React, Next.js, Svelte, TailwindCSS, Bootstrap

Backend Development: Laravel, Flask, PHP

API Development & Testing: Postman, RESTful APIs

Tools and Design: Figma

Version Control: Git, GitHub

Other Skills: Responsive Design, Cross-Browser Compatibility, Full Stack Architecture

PROJECTS

International Class Hasanuddin University – SIAKAD System

- Developed academic information system (SIAKAD) for International Class program
- Implemented student management, course registration, and grade management features
- Built comprehensive administrative dashboard for academic staff
- Technologies: Laravel, PHP, MySQL

SIPENA – Academic Reporting System

- Developed a comprehensive academic reporting website using Laravel framework
- Implemented user authentication, data management, and reporting features
- Technologies: Laravel, PHP, MySQL

SILAB – Laboratory Information Management System

- Built a full stack laboratory management system with modern architecture
- Developed RESTful APIs for seamless frontend-backend communication
- Technologies: Flask (Backend), React (Frontend)

HR Management System

- Created a human resource management platform with responsive design
- Implemented employee data management, attendance tracking, and reporting features
- Technologies: Next.js (Frontend), Flask (Backend)

LaporPak – Fire Department Reporting System

- Developed a reporting platform for fire department incident management
- Built interactive user interface with real-time data updates
- Technologies: React, JavaScript
